

**Consumptive Use Permit Thresholds
October 2014**

	Exemptions	General Permit By Rule	Noticed General Permit	Individual Permit	
	No permit shall be required for domestic consumption of water by individual users per 373.219, Florida Statutes. Water Management Districts have adopted rules allowing for other exemptions to be granted.	This permit is issued upon rule adoption for each user within the District that is below the established thresholds and meets the criteria for issuance. No notice or application would be required to be given to the District and no water use reporting would be required.	SFWMD ONLY. This permit is issued upon an applicant's self-certification that the proposed use meets all of the established criteria, is within the applicable thresholds, and receives a presumption of compliance with the criteria for issuance. It requires the applicant to provide information about the withdrawal point including well size, depth, and capacity. Information regarding the estimated use would also be required such as use type, acreage irrigated, consumers served, etc. These permits have standard conditions and have a standard duration of 20 years.	This permit is issued to consumptive uses that meet any of the criteria given below or otherwise do not meet the criteria of a lower permitting category.
