

**PRE-DRAFT 6/12/2012**

<b>Water Use Category / Classification</b>	<b>Definition / Description</b>
<b>Agriculture</b>	The use of water associated with the irrigation of crops, greenhouse and nurse products, sod, forage, and pasture and non-irrigation uses associated with freeze protection, livestock and other domestic animals, aquaculture, and other uses associated with agricultural operations. Crops include vegetables, citrus and other fruits, nuts, sugarcane, cotton, tobacco, and other field crops, rice, sorghum, and other grains.
<b>Commercial</b>	The use of water (indoor and outdoor) associated with the production of goods or provisions of services by a self-supplied commercial establishment. Commercial includes general businesses, office complexes, commercial cooling and heating, bottled water, beverage processing plants, food processing, restaurants, gas stations, hotels, car washes, laundromats and the use of water at zoos, themeparks, waterslides, and attractions.
<b>Diversions and Impoundments</b>	The diversion or extraction of water into non-District impoundments and delivery systems designed for such purposes as maintaining structural integrity, providing agricultural water, maintaining control elevations for ground water recharge, and other non-recreational, non-aesthetic reasonable-beneficial purposes;
<b>Industrial</b>	The use of water (indoor and outdoor) associated with the production of goods or provisions of services by a self-supplied institutional establishment. Industrial includes manufacturing plants, chemical processing plants, power generation facilities, and other industrial facilities. Industrial also includes the use of water for dust control, the maintenance, cleaning and washing of structures and mobile equipment, and the washing of streets, driveways, sidewalks and similar areas.
<b>Institutional</b>	The use of water (indoor and outdoor) associated with the production of goods or provisions of services by a self-supplied institutional establishment. Institutional includes hospitals, group home / assisted living facilities, churches, prisons, schools, universities, military bases, etc.
<b>Landscape</b>	The use of water for landscape irrigation including parks, common areas, large lawns and landscaped areas, cemeteries, medians and public right-of-ways.
<b>Mining / Dewatering</b>	Mining includes the use of water associated with the extraction, transport and processing of subsurface materials and minerals. Dewatering includes the removal of water to control surface or groundwater when performing activities such as construction or excavation.
<b>Public Supply</b>	The use of water provided by any municipality, county, regional water supply authority, special district, public or privately owned water utility, multijurisdictional water supply authority, or other entity consistent with the Florida Safe Drinking Water Act, for human consumption and other purposes.
<b>Recreation</b>	The use of water for the creation, maintenance and operation of recreational facilities such as golf courses, athletic fields, playgrounds; areas for fishing, boating or swimming.
<b>Other</b>	The use of water for other purposes not described in Rule 40X-2.0XX (insert subsection).
