\*\* The targets for each fiscal year are derived from corresponding work plans. All drilling plans were revised with subsequent work plans, the "best project targets" field is a composite of completed wells for FY2015-2021 and targeted wells for FY2019-2025.

\*\*\* The actual number of Wetland SA Wells constructed may be less than the wells planned due to various monitoring site already having an existing IA monitoring well, as per the site selection criteria specified in the 2015 Work Plan. The site selection criteria places an emphasis on locating wetlands that already have an existing IA around water receiving well that would meet the RMT needs.

\*\*\*\* Wet wells, does not include wetland sites.
