

SJRWMD Request to Initiate Four MFL Revisions

*CFWI Steering Committee Meeting
Kissimmee, Florida
June 28, 2013*

www.cfwewater.com

CFWI MFLs Rulemaking Background

- Steering Committee agreed in 2011 that rulemaking for MFLs in the CFWI would be postponed pending completion of CFWI Regional Water Supply Planning Process and other tasks
- Steering Committee subsequently agreed to support SWFWMD moving forward with MFLs rulemaking for Lake Hancock to support an MFLs recovery strategy for the Peace River

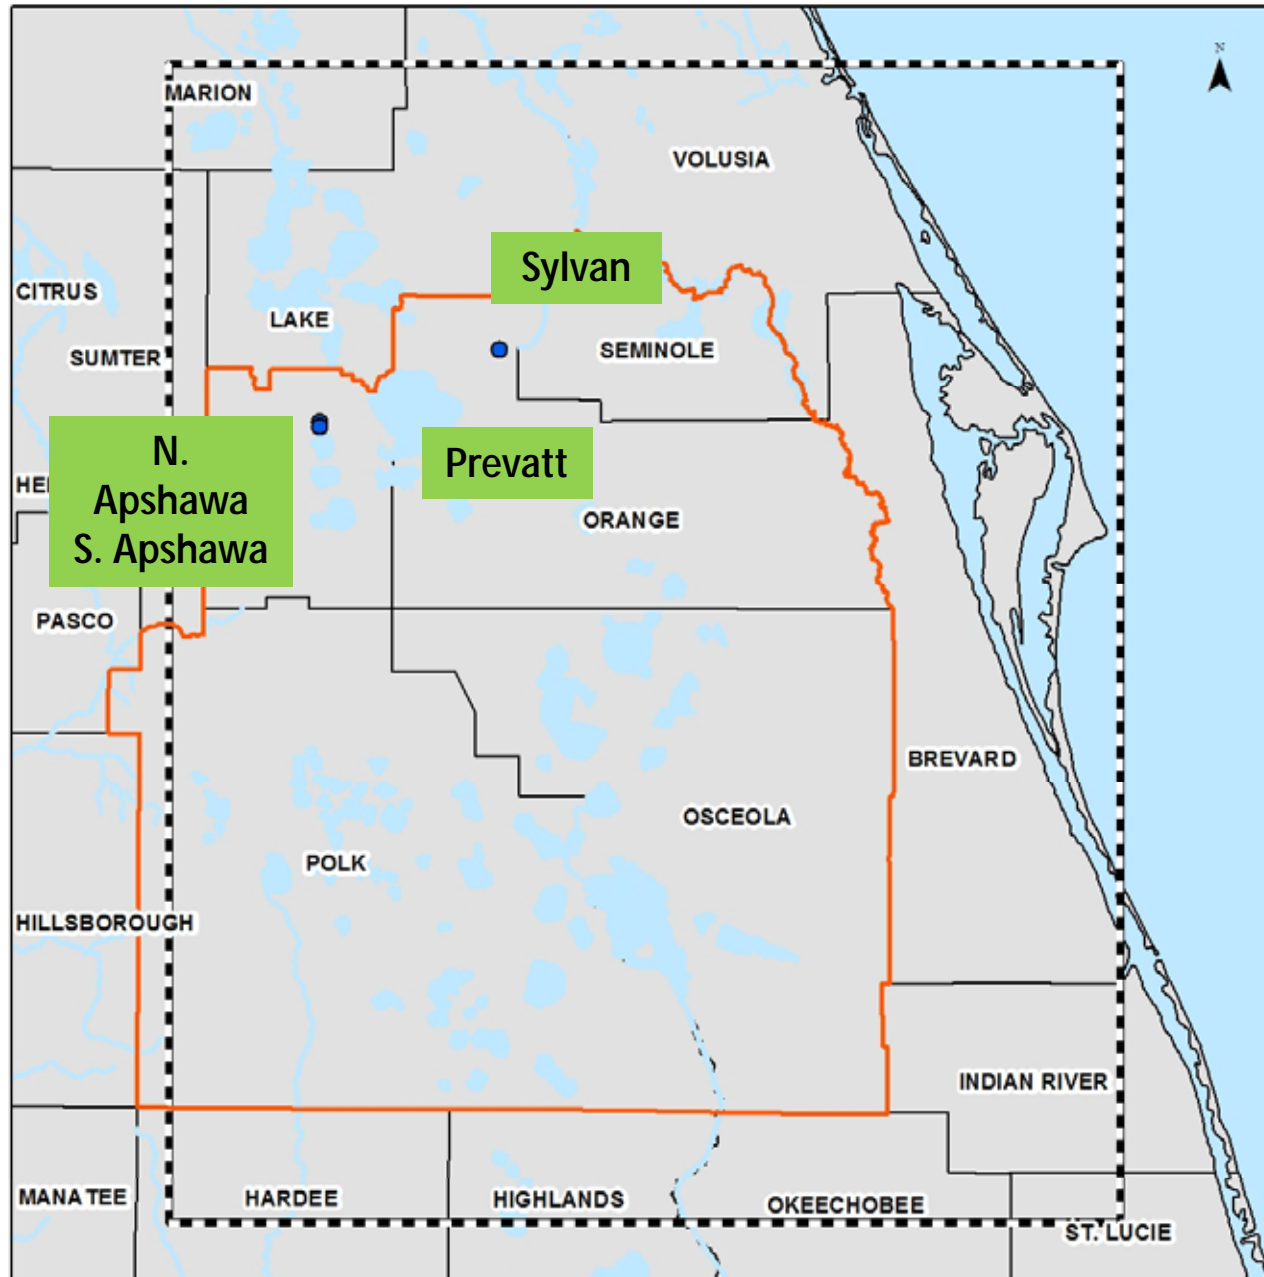

Current Issue

- SJRWMD has developed revised MFLs for four lakes within the CFWI area (North Apshawa, Prevatt, South Apshawa & Sylvan) based on improved scientific information
- Proposed MFLs are less constraining on water users than the MFLs currently adopted for the lakes

Current Issue

- Initiation of rulemaking for the revised MFLs will support implementation of the SJRWMD water use regulatory program
- Initiation of rulemaking for the revised MFLs will also be helpful for recovery/prevention strategy development

Lake Locations

MOC Position and Request to Steering Committee

- MOC and STOPR+2 support SJRWMD moving forward with initiation of rulemaking, with a schedule that identifies completion of rulemaking after the expected development of the CFWI Regional Water Supply Plan
- Request Steering Committee support for this position
